SUMMARY

14 years building at the intersection of platform and partner. I've shipped AI agents, Copilot plugins, reference architectures, and demo systems used by hundreds of engineers — at Cisco, Splunk, and Atlassian, with partners ranging from global SIs to Microsoft and AWS.

I don't just advise partners on what to build. I build it with them.

EXPERIENCE

Atlassian · August 2025 – Present · Remote

Senior Partner Solutions Architect – Atlassian Platform

- Partner Solutions Architect for Isos Technology and Adaptavist — with broader contributions to ecosystem standards, AI tooling, and partner enablement adopted across the global PSA org.
- Primary technical liaison between partner builders and Atlassian engineering; surfaced blockers around LLM integration, data residency, and Forge runtime limits before they reached deals
- Led "Office Hours with Atlassian" at PwC on Rovo agent architecture, Teamwork Graph, and AI code generation — the PwC partner lead called it "one of the most impactful sessions we've had to date"
- Selected as speaker at Partner Accelerate '26 ("The Agentic Edge"), presenting agentic AI implementation patterns to ~75 partner practitioners
- Built the AWAf Assessment Template (v26.02) and Partner Solutions Template, adopted as the standard framework across Atlassian's global PSA org (~30 people); followed with a Rovo AI agent that automates assessments against the checklist, in active use globally
- Presented "Forge & AI" and "Vertical Solutions" at Isos Technology's Sales Kickoff; led their Clinical Trial Management solution from concept to market launch with ~30 qualified customers identified at launch
- Brought in directly by partners to unblock critical escalations at Adaptavist (Uber) and Isos (StoneX), coordinating across Atlassian engineering, partner delivery, and customer stakeholders

Cisco · June 2018 – August 2025 · Remote

Roles held: Global Partner Technical Manager, Splunk · SE Team Lead, FSO Platform Development Partner Onboarding · Sales Engineer Manager, AMER Elite Partners · Cloud Channel Solutions Engineers Team Lead · Global Azure Lead Solutions Engineer, Cloud Channels · Demo Architect & Senior Solutions Engineer

Platform Partnerships

- Designed and developed a Splunk plugin for Microsoft Security Copilot — a key technical proof point in establishing the Splunk–Microsoft partnership in the period immediately following Cisco's acquisition of Splunk
- Served as primary technical point of contact brokering the Splunk–Microsoft partnership for a new add-on to ingest data from Microsoft Edge for Business
- Drove the AppDynamics technical workstream for the Microsoft partnership that made AppDynamics available within Azure Spring Cloud, owning GTM strategy for Azure-focused cloud-native and serverless initiatives across sales, product, and product marketing

Partner Programs & Enablement

- Owned global enablement strategy and solution architecture for ISV partners building on Cisco Observability Platform; onboarded 30+ partner-built solutions into the ecosystem
- Managed a geographically distributed SE team including EMEA-based engineers, coordinating technical partner support across regions and time zones

- Managed the SE team covering Cisco's most strategic channel partners; team met new and renewal sales quotas in FY23
- Developed and delivered Cisco Full-Stack Observability workshops with regional partner engineers

Technical Reputation & Demo Architecture

- Built demo assets used by 200+ SEs worldwide, including applications, recordings, and documentation across customer scenarios
- Served as technical lead at Cisco Live for three consecutive years, earning Distinguished Speaker recognition; developed demo strategy, content, and on-floor presence for cloud channel initiatives
- Partnered with AWS product and engineering to validate AppDynamics monitoring for Lambda functions deployed as Docker containers, driving the joint GTM effort
- Developed AWS and Azure serverless monitoring workshop content; delivered at industry and partner events

Oracle · August 2012 – July 2018 · Remote

Demo Architect

- Supported 150+ sales consultants and solutions engineers with reusable demo assets, integration prototypes, and product extensions across global regions
- Built and presented connected car demo integrating Oracle Service Cloud and Oracle IoT Cloud Service as a featured in-booth presenter at Oracle OpenWorld and GM Geek Week
- Prototyped integrations between Oracle's CX SaaS suite and the Pepper humanoid robot, spanning knowledge management, CPQ, marketing, and commerce

AWARDS & RECOGNITION

- 2024 Distinguished Computer Science Alumnus of the Year, Mississippi College
- Splunk Global Partner Team Rising Star FY25 Stub Quarter
- FY16 Solutions Consulting MVP
- Q1 FY18 Transformation Award
- FY19 Top Performer — Sales Strategy & Enablement
- Cisco FY21 Achiever
- FY22 Q3 AppDynamics SE of the Quarter: Cloud & Cross-Architecture

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- The Extraordinary Presenter
- Atlassian Certified ITSM Specialist
- Atlassian Certified Agile DevOps Specialist
- Atlassian Certified Teamwork Collection Specialist
