WAYNE BROWN

brownkw@gmail.com · https://www.linkedin.com/in/brownkw · Ennis, MT (Open to Remote)

Summary

Partner solutions architect with 14 years in solutions engineering and demo architecture. I work with partner leaders to build services businesses around customer needs. My hands-on work includes Microsoft and AWS integrations, plus AI agents and demo systems used by engineers worldwide.

Experience

Atlassian · August 2025 to Present · Remote

Senior Partner Solutions Architect, Atlassian Platform

Work with Isos Technology and Adaptavist leadership on services strategy and solution development.

Partner practices

- Guided Isos toward a solutions-led services business with president/CEO backing. Helped identify offerings from recurring work in its existing customer base.
- Validated customer use cases and architectures for seven launched Isos offerings, including employee onboarding and AI FinOps.
- Reviewed Isos solution pricing for growth in Atlassian adoption and long-term partner viability.
- Helped Adaptavist establish a repeatable development process with field CTO and general manager backing, connecting solution priorities to customer opportunities.
- Helped validate Adaptavist's AI solution for RFPs and sales forecasting through architectural and commercial review. Adaptavist is piloting it internally.

Technical work

- Connected Adaptavist practice teams with Atlassian early access programs to inform solution development.
- Built assessment and solution templates adopted across Atlassian's global Partner Solutions Architect organization of about 30 people.
- Built a Rovo agent to automate checklist assessments, now in active use globally.
- Served as the primary liaison between partner builders and engineering on LLM integration, data residency, and Forge runtime limits.
- Coordinated customer escalations between Atlassian engineering and partner delivery teams.

Cisco · June 2018 to August 2025 · Remote

Roles held: Global Partner Technical Manager, Splunk · SE Team Lead, FSO Platform Development Partner Onboarding · Sales Engineer Manager, AMER Elite Partners · Cloud Channel Solutions Engineers Team Lead · Global Azure Lead Solutions Engineer, Cloud Channels · Demo Architect & Senior Solutions Engineer

Platform partnerships

- Designed and built a Splunk plugin for Microsoft Security Copilot to support the Splunk-Microsoft partnership following Cisco's acquisition of Splunk.
- Served as the primary technical contact for the Splunk-Microsoft partnership on an add-on to ingest Microsoft Edge for Business data.
- Led the AppDynamics technical workstream for the Microsoft partnership that brought AppDynamics into Azure Spring Cloud.
- Owned go-to-market strategy for Azure cloud-native and serverless initiatives across sales, product, and product marketing.

Partner programs

- Owned global technical partner strategy and solution architecture for ISVs building on Cisco Observability Platform; onboarded 30+ partner-built solutions.
- Managed an SE team that included EMEA-based engineers, coordinating partner technical support across regions and time zones.
- Managed the SE team covering Cisco's most strategic channel partners. The team met new and renewal sales quotas in FY23.
- Developed and delivered Cisco Full-Stack Observability workshops with regional partner engineers.

Demo architecture and workshops

- Built demo assets used by 200+ SEs worldwide, including applications, recordings, and documentation for customer scenarios.
- Led AppDynamics and observability demo areas across multiple events over four years.
- Developed demo strategy and content for cloud channel initiatives, with an on-floor role at Cisco Live.
- Worked with AWS product and engineering to validate AppDynamics monitoring for Lambda functions deployed as Docker containers and led the joint go-to-market effort.
- Developed AWS and Azure serverless monitoring workshops and delivered them at industry and partner events.

Oracle · August 2012 to July 2018 · Remote

Demo Architect

- Supported 150+ sales consultants and solutions engineers across global regions with reusable demo assets, integration prototypes, and product extensions.
- Built a connected car demo integrating Oracle Service Cloud and Oracle IoT Cloud Service. Presented it at Oracle OpenWorld and GM Geek Week.
- Prototyped integrations between Oracle's CX SaaS suite and the Pepper humanoid robot, covering knowledge management, CPQ, marketing, and commerce.
